

		-
▲ Remove unused CSS	2.4 s	~
Minify CSS	0.3 s	~
Diagnostics — More information about the performance of your application. These numbers don't <u>directly affect</u> the Performance score.		
▲ Avoid enormous network payloads — Total size was 12,223 KB		~
▲ Serve static assets with an efficient cache policy — 28 resources found		~
▲ Ensure text remains visible during webfont load		~

	Minimize main-thread work — 7.4 s	~
A	Reduce JavaScript execution time — 4.2 s	~
	Avoid chaining critical requests — 34 chains found	~
	User Timing marks and measures — 28 user timings	~
	Keep request counts low and transfer sizes small — 36 requests • 12,223 KB	~
Pas	ssed audits (13)	~

Accessibility

These checks highlight opportunities to improve the accessibility of your web app. Only a subset of accessibility issues can be automatically detected so manual testing is also encouraged.

Contrast — These are opportunities to improve the legibility of your content.

Background and foreground colors do not have a sufficient contrast ratio.

Names and labels — These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.

Form elements do not have associated labels

Additional items to manually check (11) — These items address areas which an automated testing tool cannot cover. Learn version our guide on conducting an accessibility review.

Progressive Web App

These checks validate the aspects of a Progressive Web App. Learn more.

Fast and reliable

Page load is not fast enough on mobile networks

- Your page loads too slowly and is not interactive within 10 seconds. Look at the opportunities and diagnostics in the "Performance" section to learn how to improve.
- Interactive at 67.7 s
- Current page does not respond with a 200 when offline
- ▲ start_url does not respond with a 200 when offline No usable web app manifest found on page.

Installable

Does not register a service worker that controls page and start url	
2000 Hot register a convice worker that controls page and 3 car c_ar 1	
Web app manifest does not meet the installability requirements Failures: No manifest was fetched.	•
PWA Optimized	
Does not redirect HTTP traffic to HTTPS	,
Is not configured for a custom splash screen Failures: No manifest was fetched.	
Does not set a theme color for the address bar.	
Failures: No manifest was fetched, No ` <meta name="theme-color"/> ` tag found.	
Content is sized correctly for the viewport	
Has a <meta name="viewport"/> tag with width or initial-scale	
Does not provide fallback content when JavaScript is not available	
The page body should render some content if its scripts are not available.	
Does not provide a valid apple-touch-icon	
dditional items to manually check (3) — These checks are required by the baseline PWA Checklist but are not
